

# Keystone Air Compressor

Licensed Provider of Genuine GE Renewal Parts

The Keystone Air Compressor was utilized in thousands of GE outdoor oil circuit breaker mechanisms starting in 1947. The Keystone models AA, A, & D were among the most popular compressor models utilized in the MA13, MA14, MA15, and MA16 pneumatic operating mechanisms. These compressors have been obsolete for many years, however customers can directly replace all of the above air compressor models with GE P/N 0117B3890001, which is readily available from stock. Replacements for other models are also available by contacting **Parts Super Center**.
